Report of the Mayor

To the Citizens and Taxpayers of the City of Rutland:

I submit the following report for the year 1910—my third report as mayor of the city:

The current expenses were paid, there was no outstanding indebtedness at the end of the year, and the cash on hand amounted to \$3,561.70—\$1,376.10 in the water department, and \$2,185.60 in the general fund. The sinking fund appropriation was \$10,900; the fund earned \$5,855, reducing the bonded indebtedness \$16,755, making the net debt \$437,261.23.

In my report for 1909 I called attention to certain extraordinary expenses that would have to be met in 1910. These amounted to over \$9,200, as follows:

Land damages, etc., Spellman Terrace,	\$3,722 00
Isolation hospital and equipment,	2,510 00
Fire whistle,	1,541 00
Expense of quadrennial appraisal,	800 00
Examination and re-commitment of insane paupers,	640 00
Total,	\$9,213 00

Although an unusually large cash balance was brought over from 1909 and the receipts for 1910 were larger than for the previous year, it became

evident before the tax rate was fixed that it would be necessary to increase the rate or to use more of the water funds than ordinarily had been used, if the fiscal year was to close without outstanding indebtedness. The city council assessed the usual rate of \$1.60, and voted to use enough of the water funds to make the issue of a temporary loan warrant unnecessary. This action was criticised by those who doubt the wisdom or question the right to use these funds for general purposes. If the charter prohibited the use of the water funds for such purposes, then the tax rate would be increased and the citizens spared the constant agitation of this subject, but so long as it depends upon the city council to decide what shall be done with the surplus water funds, it is impossible to predict whether the practice of using them solely for water purposes would be carried out, if once established, or whether one council might not reverse the practice and again make use of them for general purposes. It is possible, also, that the taxpayers themselves, after being subjected to a higher tax rate, might prefer to have used for general purposes any surplus that might be left after the water department had been properly taken care of, and have the benefit of a corresponding reduction in the tax rate.

There has been such a lack of information with reference to the amount of water funds that have been used for the general requirements of the city, that I have had compiled from the city reports the following statement of receipts and expenditures in the water department for the eighteen years Rutland has been a city. To properly trace these items in the several reports, it should be taken into consideration that for the years 1893-1896, the interest on the

water indebtedness, with the exception of a few items, was charged in the water account; for the years 1897-1908 in the interest account; and for the years 1909 and 1910 in the water account. The sinking fund appropriation for this department for the years 1893-1908 was charged in the sinking fund account, with the exception of a special appropriation of \$500 a year, beginning in 1899, which has always been charged in the water account; and in 1909 and 1910 the whole appropriation was charged in the water account. An extra payment was made to the sinking fund, at the close of the year 1904, the proper proportion of which has been added to the usual appropriation.

RECEIPTS, COST OF MAINTENANCE, ETC.,

				\$9,764.84	\$16,123.87
Water taxes, 18 years.....					\$504,796.87
Received from other sources.....					5,576.37
Cost of maintenance, 18 years.....			\$182,642.19		
					\$526,497.11
Interest.....				101,084.71	
Sinking fund.....				49,925.00	
					\$333,651.90
Amount of water funds for general pur-					
poses.....					\$192,845.21
Average, per year.....					\$10,713.62

The foregoing table explains itself. While a large amount of this money has been used for general purposes, it undoubtedly will surprise many to know that the average has been less than \$11,000 a year—many have believed it to be from \$20,000 to \$30,000.

The new appraisal of real estate, which will go into effect in 1911, will increase the grand list over \$5000, adding to the tax levy, if the rate is \$1.60, about \$8500, provided there is no decrease in the personal list.

There ought not to be any increase in the fixed charges the coming year for there are no unusual expenses in sight, excepting the necessity of purchasing a pair of horses for fire station No. 1. Considering the advance in wages and commodities and the growth of the city during the past few years, the fixed charges, as a whole, have shown but little increase, some even showing a decrease. The charities and corrections account for 1910 was over \$400 less than the average for the years 1897-1910; the interest account over \$2,500 less; the salary account practically the same excepting the extra expense of the quadrennial appraisal; the police account about \$1000 more; the fire account about \$2,000 more (not including the cost of steamers and fire whistle); and the light account about \$2,200 more, caused by the increase in the number of lights in use as shown by the following statement: In December, 1898, (the next year after the reduction in the price of lights went into effect), the city was using 33 all night and 92 12.30 arc lights at an annual cost of \$9,727; in December, 1910, 43 all night and 148, 12.30 arcs at an annual cost of \$13,484. The same number of arc lights in use in 1910 would have cost

over \$14,700 at the prices paid in 1898—over \$700 more than the entire lighting bill for 1910, including the lighting of the city hall, etc., and if reckoned at the prices paid in 1897 would have cost over \$19,900. As there is but little change in the other fixed charges—library, hospital and sinking fund—from year to year, it is evident that so far as the fixed charges are concerned the taxpayers have little reason to complain of increased expenditures.

DEPARTMENT OF PUBLIC WORKS

A good deal of permanent work has been done in the street, sewer and water departments. North Main street has been macadamized from Field avenue to the city line, so that with the exception of the Dunklee hill, the main street of the city is macadamized its entire length. Some parts of the street are in bad condition but the basis for a good roadway is there, and undoubtedly the entire street will be made good in due time. Nickwackett street, and Kingsley avenue from Church street to Lincoln boulevard have been macadamized, and State, Evelyn, Freight, and the middle section of Wales street have been re-surfaced and put in excellent condition. The repairs begun on Merchants Row in 1909, were continued northerly to Grove street, so that the principal business street of the city is now in better condition than for several years past.

Sewers have been built as follows: Along South street to the west end of the street and thence along St. Joseph avenue to connect with the sewer in River street; from Grove street along the Tenney brook to North street, and from the north end of the Pearl street sewer across the brook to Adams street and along Adams and Vernon streets to Lincoln boule-

vard, thereby taking all the sewage out of the Tenney brook; and from South Main street westerly across the fair ground, relieving a dangerous and offensive situation in that locality.

Water mains have been laid in Cottage street, Avenue A., Clover street, Park street from Granger to Forest street, and in a portion of Kingsley avenue.

Other permanent work has been done in each department, including the building of a good many sidewalks, all of which will be given in detail in the report of the commissioner of public works. The usual repairs have been made on streets and sidewalks, and sewer and water connections made when called for.

A successful attempt was made during the summer to get rid of the dust nuisance by oiling some of the macadamized streets, the abutters paying for the material and the city applying it. Several car loads of Dustoline were used with good results, and a heavier oil, intended more especially for a road preservative, was used to good advantage on several of the newly made streets. The results were so satisfactory to the residents of the streets so treated that undoubtedly this method will be used to the exclusion of water sprinkling in the future. It was not claimed for the lighter oil that it would preserve the roadway to any great extent, but I am convinced that both kinds of oil used did preserve the surface sufficiently to warrant the city in bearing some part of the expense. I would recommend that arrangements be made whereby the city may bear its share of the cost of oiling a street whenever a tender of an equitable proportion of the expense is made by the abutters.

DEPARTMENT OF PUBLIC SAFETY

The police and fire departments have been conducted in the usual satisfactory manner. The city has been fortunate in not having had any large fires during the year, and such as have occurred have been handled in a skilful manner. The equipment of the department is in good condition but it will be necessary to purchase a pair of horses for station No. 1 early in the coming year.

This report was not completed until after the fire department had sustained a severe loss in the death of Captain P. H. Barrett, January 16th, from injuries received while on duty at a fire a few days previous. I wish to pay tribute to Captain Barrett's faithfulness and fearlessness as a fireman and his geniality and large heartedness as a man. He was a member of the old volunteer department, had been connected with the paid department for a long period, and has always been considered one of the best of the many excellent firemen it has been the city's good fortune to have in its employ.

The city has been remarkably free from crime during the year. The members of the police department have performed their duties in an acceptable manner.

SCHOOLS

I believe our schools compare favorably with those of the other cities and towns of the state and that there is a constant effort on the part of everyone connected with them to increase their efficiency. The usual reports will be made by the school commissioners and superintendent and will be worthy the careful consideration of every citizen,

ANNUAL REPORT

CHARITIES AND CORRECTIONS

I have mentioned that fact that the expenses of this department were less than the average for the past fourteen years, which shows good financial management. I believe the department is equally as well managed from an humanitarian standpoint and that the overseer and his wife are taking the best of care of the city's wards and property.

RUTLAND HOSPITAL

The city council appropriated \$3,500 to the Rutland Hospital as has been the custom for several years. The record of patients treated is as follows: Patients admitted, 45; 25 males, 20 females; medical cases 22, surgical cases 23. The longest time any one patient was cared for was 98 days, and the total number of days for all patients was 948.

In my report for 1909 I commended the custom of making this appropriation. I have had further opportunity during the past year for investigating the methods employed at the hospital and it is a pleasure for me again to express my appreciation of the work being done there. I trust the hospital may never be hampered for lack of necessary funds.

In this connection I will state that the isolation hospital contemplated in 1909 has been built on the city's property just off Woodstock avenue. While it is to be hoped that little use will ever be made of this hospital, it is a satisfaction to know that in case it is needed, there is a new, commodious building conveniently and safely located, to take the place of the old building that long ago outlived its usefulness.

CITY OF RUTLAND

RUTLAND FREE LIBRARY

The appropriation to the library was increased from \$2,250 to \$2,500. The library occupies a high place in the estimation of all who make use of it and it should be liberally supported. The librarian has had much experience in library work, and, with her capable assistants, looks after every detail with much care and patience.

BOARD OF HEALTH

The health officer's report will give in detail what has been accomplished by this board. Its members have been active in the campaign for cleanliness and their efforts are to be commended.

CONCLUSION

I shall retire from the office of mayor, after three years' service, with a feeling of relief, realizing that mistakes have been made but conscious that in whatever I have done, I have had the interest and advancement of the city at heart. A complete change in our form of government has taken place during my service as mayor, a change that has placed Rutland among the progressive cities of the country in this respect. I believe the new charter has passed the experimental stage and that we have the right idea in city government. The charter is good enough for present needs if its provisions are faithfully carried out. Whether this is done will depend upon the officials who have the city's affairs in their keeping, but primarily upon the citizens who choose such officials.

Respectfully submitted,

H. O. CARPENTER,
Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—In accordance with the city ordinances, I have the honor to submit this report of the City Treasurer for the fiscal year ending December 31, 1910.

Report of the Sinking Fund Commissioners

To the Honorable Council of the City of Rutland:

The following statement shows the condition of the sinking fund of the City of Rutland on January 1, 1911:

Balance as reported January 1, 1910..	\$149,983 77
Received from City of Rutland.....	10,900 00
Received interest.....	5,855 00
Balance in our hands invested as below, \$166,738 77	
City of Rutland, bonds and notes.....	\$83,000 00
City of New York 3½ per cent. bonds.....	15,000 00
N. Y. C. & H. R. R. (L. S. Col.) bonds.....	26,000 00
L. & N. Bonds.....	5,000 00
Rutland R. R. bonds.....	11,000 00
B. & R. R. R. bonds.....	5,000 00
New York Telephone bonds	4,000 60
Cash on hand and in bank	17,738 77
	<hr/> <u>\$166,738 77</u>

Respectfully submitted,

NEWMAN K. CHAFFEE,
HENRY F. FIELD,
JOHN A. MEAD,

Commissioners of Sinking Fund.

Report of the Public Works Commissioner for 1910

To the Honorable City Council:

Gentlemen:—I respectfully submit herewith the second annual report of the Commissioner of Public Works.

Said report is divided into sections corresponding to the various branches of the city work which are under the management of this department.

STREET IMPROVEMENTS, ETC.

Pavements

After enlarging the stone drain crossing under Merchants Row south of the opera house sufficiently to convey the storm water from the east to the west side of the Row at that point, the pavement from there northerly to West street was resurfaced with a twenty-five per cent asphalt mixture similar to the pavement laid in 1909.

We have also extended the paving across West street to the south end of the Grove street pavement.

Crusher

We have installed a new boiler, engine and drill at the North Main street quarry. All the stone crushed during the past year was taken from that ledge.

Macadam

We have macadamized by the ordinary method North Main street from near Field avenue northerly

to the city line; also Kingsley avenue from Church street to Lincoln boulevard.

Both of these streets were graded considerably before the stone roadways were constructed. We also laid a twelve inch cast iron culvert across the Main street roadway in the valley north of Field avenue.

We constructed a soil drain on the east side of Nickwackett street and macadamized the roadway with crushed stone bound together with tar. 919 loads of stone were used in the above stated work.

Macadam Repairs, Etc.

We have re-surfaced the roadways of State street from Grove street to Pierpoint avenue, Wales street from Center street to Washington and also of Freight and Evelyn streets with tar bound macadam. In the re-surfacing work we used 1354 loads of stone.

We also kept one team and a few men repairing the mud holes, rough places, etc., in the roadways under the direction of the State Highway Commissioner a considerable part of the time during the summer and autumn. One-half the expense of that work was paid by the State from the automobile money. Our roadways are kept in a better condition for all classes of travel by such constant attention to the rough places. We used 465 loads of crushed stone in that repair work.

BRIDGES

The Ripley and the State street bridges have been re-planked. One of the steel floor beams in the River street bridge has been so destroyed by the gas and steam from the locomotives that it is not safe. Therefore it is temporarily supported by a built-up wooden beam. A steel beam will have to be put in

place of the old beam, also the rest of the steel work that is directly over the tracks should be tested, renewed and painted wherever necessary. The State street and Ripley bridges also need painting. The abutments under the West street bridge ought to be re-built.

SIDEWALKS

We have re-surfaced and repaired a great many of the old tar concrete walks. We have also re-constructed 727 linear feet of those walks that were so uneven and out of grade that they could not be properly re-surfaced.

In addition to the above we have concreted 1417 linear feet more of walks. The location of all of the principal sidewalk work, etc., is shown in tabulated form in the engineering section of this report.

CATCH BASINS

Three cast iron catch basins were constructed during the year. One on Evelyn street across the street from Landon & Co.'s store, and two near the west end of Kingsley avenue.

SEWER SYSTEM

We have constructed a twelve-inch sewer across the south side of the Fair Ground lands. Also a twelve-inch sewer from Grove street northeasterly up the Tenney Brook valley to North street. We have extended the Pearl street sewer northerly across Tenney Brook, thence easterly to Adams street, thence northerly to Vernon street and thence easterly to Lincoln boulevard.

The total of sewer extensions during the year amount to 8678 feet. It is quite likely that at some future time the eight inch pipe which was laid on

North street several years ago from Tenney Brook easterly to Pearl street will have to be replaced by a larger pipe.

The sewer on North street westerly from Tenney Brook should be re-built, and also the stone sewer under the Rutland Railroad and across Pine street near the tunnel. There are also a few sections of the city where sewers should be constructed to accommodate the existing houses and make their surroundings more sanitary.

House Connections

There have been nineteen connections from houses, etc., made to the sewer system.

ACCOUNT OF LABOR AND MATERIAL USED IN STREET DEPARTMENT, ETC.

Amount paid as per Street Account.....	\$15,731 64
Amount paid as per Sewer Account.....	4,961 88
Amount paid as per Sidewalk Account..	1,902 84
Amount paid under direction of State..	2,105 16
	<hr/>
Amount expended in labor on parks, bridges, etc, and paid from General Account, etc.....	330 50
Total amount paid as per Street Ac- count, etc.....	<hr/> \$24,701 52

Amount expended in labor on parks, bridges, etc, and paid from General Account, etc.....	330 50
Total amount paid as per Street Ac- count, etc.....	<hr/> \$25,032 02

Expended as follows:

Boiler and drill at crusher...		690 75	690 75
General work cleaning and repairing streets, etc.....	4,198 28	3,400 45	7,598 73
	<hr/>	<hr/>	<hr/>
	\$13,456 52	\$11,245 00	\$24,701 52
Parks, bridges, etc., (General Account).....			330 50
			<hr/>
			\$25,032 02

WATER SYSTEM

We have extended the distribution system by laying 1545 feet of mains. We have also constructed a six inch main on Cottage street, 724 feet of which is to replace an old two inch pipe. The location, size, amount, etc., of mains constructed are shown in the following table:

Extension of water mains, 1910.

	Size	Length, Feet	Cost of Labor	Cost of Material
Avenue A.....	6"	360	\$ 70 26	\$236 00
Cottage street.....	6"	1124	709 46	788 50
Chaplin avenue.....	6"	60	35 63	35 20
Clover street.....	6"	200	94 50	180 50
Kingsley avenue.....	6"	200	82 03	94 20
Park street.....	6"	300	78 37	219 50
Wales and Washington..	12"	25	51 21	128 25
		<hr/>	<hr/>	<hr/>
Total		2,269	\$1,121 46	\$1,682 15

We have repaired four leaks in main pipe.

Hydrants

We have set one new hydrant at the corner of Park and Forest streets. We have also set two new

hydrants to replace broken ones. One at the corner of Watkins and State streets and the other on West street east of the railroad crossing at Holmes' shop.

There are yet several places in the city where more hydrants are needed. We have hydrants that are capable of furnishing several lines of hose with sufficient water and pressure for fire fighting. We also have other hydrants which, on account of their location and the size of the water mains, are not capable of supplying sufficient water and pressure for more than one hose stream. We think every fireman should know by actual tests the amount of water and pressure he can get at each hydrant. If our distribution system is defective at any point for fire fighting purposes, those tests, if properly conducted will demonstrate such fact. Then those places, if any, could be remedied before any harm is done.

VALVES

We set a valve on the hydrant branch at the corner of Park and Forest streets. We also placed four valves in the new mains as shown by the following table:

VALVES SET ON MAINS

Location	Size, Inches	Number
Avenue A at Jackson avenue.....	6	1
Cottage street opposite No. 30.....	6	1
Wales and Washington.....	12	2
Total		4

Thirty-six new services have been constructed and twenty-six old ones repaired and relaid.

Reservoir

We have concreted a portion of the large reservoir at its south-west corner and in front of spill-

way. That concrete stops nearly all of the leakage from the reservoir.

RECORD

Total valves previous to Jan. 1911.....	567
Total taps made previous to Jan. 1, 1911.....	2,790
Total hydrants set previous to Jan. 1, 1911.....	165

ACCOUNT OF LABOR AND SUPPLIES IN WATER DEPARTMENT

Total paid on account of Water Department.....	\$17,166 81
--	-------------

Expended as follows:

	Cost Labor	Material	Total

Respectfully submitted,

D. W. TEMPLE,
Commissioner of Public Works.

Commissioner of Public Safety

To the Honorable City Council:

Gentlemen:—I beg to report as follows:

FIRE DEPARTMENT

The manual force of your Fire Department consists of the following regular force:

James C. Dunn, Chief,
Patrick H. Barrett, 1st Assistant,
John P. Ready, 2nd Assistant,
Charles J. Clifford,
Cornelius Sammon,
Orrin R. Packard,
Bernard J. Morris,
John H. Sheridan,
Walter F. Wands,
F. S. Wallett,
and 20 Call Men.

The expenses of this Department for the past year are as follows:

Pay roll.....	\$8,415 70
Supplies, including 1000 ft. new hose....	1,026 28
Repairs	140 89
Feed and straw for horses.....	551 45
Electric lights and electric power for fire alarm system, re-charging batteries, etc.....	515 01
Blacksmithing	26 60
Laundry	59 44
Fuel for Fire Stations and Steamers.....	149 14

ANNUAL REPORT

Veterinary service.....	\$ 1 00
Insurance of members of the Department	289 41
Telephone service.....	7 00
Rent for Fire Station No. 2, two years.	36 00
Rent of one horse.....	45 00
Air Compressor Plant for operating fire alarm whistle.....	1,541 32
Total	<u>\$12,804 24</u>

You will please note that a greater portion of the extra expense lies in paying for the Air Plant for operating the fire alarm whistle and for the 1000 ft. of new hose, also for rent of horse, this latter item was occasioned by the death of one of the horses in Fire Station No. 1.

The fire fighting apparatus is in first-class condition. There has been no additional apparatus purchased the past year aside from the 1000 ft. of hose.

FIRE ALARMS

Aside from minor repairs there has been very little done to this system. Quite a large portion of the wiring was replaced a year ago; the balance is in such bad condition that it should be replaced this coming season; also the repeater at Station No. 1 should be overhauled.

HYDRANTS

There should be a hydrant at the corner of Baxter and Robbins street. There should also be a large hydrant with steamer connections immediately in the vicinity of the Lincoln Iron Works; also a hydrant immediately east of the Railroad Crossing on Allen street.

RECORD OF FIRES FOR YEAR ENDING DECEMBER 31, 1910

POLICE DEPARTMENT

Your Police Department consists of five regular officers as follows:

Thomas C. Elworth, Chief,
Silas C. Warren,
Patrick H. Conlin,
Jesse Young,
Timothy Dwyer,

Thomas C. Elworth also acts as regular.

In addition to this force we have 22 special police officers.

The total number of arrests and arraignments are 270, of which 265 were males and five females.

The offenses were:

Intoxication, first offense.....	137
Intoxication, second offense.....	30
Intoxication, third offense.....	60
Vagrancy	6
Refusing to pay railroad fare.....	1
Furnishing liquor.....	2
Larceny.....	6
Breach of peace.....	19
Truancy	1
Loitering about Railroad Station.....	3
Breaking and entering.....	2
Non-support.....	1
Burglary.....	2

The expense of maintaining this department was as follows:

Pay roll.....	\$4,354 64
Telephone service.....	31 34
Batteries, etc.....	9 15
Disinfectant	12 50

Overcoats	\$22 50
Repairing cell door.....	5 88
Glass and sundries.....	2 60
	<hr/> <u>\$4,438 61</u>

This, you will note, makes a slight increase over last year, which can be accounted for from the fact that extra men were required during Carnival week and during the street car troubles and the extra number of arrests for intoxication owing to licensing the saloons.

The inventory of office furniture, overcoats, accouterments, etc., remains practically the same as last year.

I would recommend:

1st—That the pay of all regular police officers be increased.

2nd :—A separate detention room for women.

3rd :—At least one additional regular policeman.

4th :—A system of telephones that will enable communication between the police station and officers while on duty.

Respectfully submitted,

FRED R. PATCH,
Commissioner of Public Safety.

Report of the City Attorney

To the Honorable City Council:

Gentlemen :—Since my last report as City Attorney no new suits have been brought against the city and no suits have been instituted by the city.

The case of Lewis Avery v. the City of Rutland is still pending in the Rutland City Court. That case, as was stated in my report of last year, is an appeal by said Lewis Avery from an order of former street commissioners as to the necessity of establishing a sewer across his land, and as to the amount of damage awarded him, the sewer being the one from Woodstock avenue sewer to Moon Brook sewer. No further proceedings have been had in this case since my last report.

The case of the State Board of Health v. Aaron Sheldon, Charles Sheldon, M. E. Wheeler, Mark Tenney, G. W. Sawyer and Michael Rooney in the Court of Chancery for Rutland County is still pending. This suit was brought for the purpose of enforcing the orders and regulations of the State Board of Health to prevent pollution of the city water supply by residents of Mendon living on the water shed draining into the city water supply.

The defendants, Mark Tenney, G. W. Sawyer and Michael Rooney, not having complied with the temporary injunction, issued December 14, 1909, by the Hon. William H. Taylor, Chancellor, enjoining defendants from maintaining sources of pollution of the water supply, contempt proceedings were instituted against them, for failure to obey the order,

at the March term, 1910 before Hon. Alfred A. Hall, Chancellor. The contempt proceedings were prosecuted by the Attorney General and the City Attorney. After a full hearing, the Chancellor adjudged the defendants Mark Tenney and G. W. Sawyer guilty of contempt of Court and fined them \$25.00 each. The Chancellor found that the defendant Michael Rooney was not guilty. Additional parties have been brought in as defendants in the Chancery suit and the cause has been referred to Hon. Chas. H. Darling, of Burlington, as Special Master, to hear and report the facts. The temporary injunction is still in force.

I have no other matter to report on.

Respectfully submitted,

MARVELLE C. WEBBER,
City Attorney.

Report of the Overseer of the Poor

To the Honorable City Council:

Gentlemen:—I respectfully submit the report of the Overseer of the Poor for the year ending Dec. 31, 1910:

Respectfully submitted,

PETER BROUSSEAU,
Overseer of the Poor.

Report of the Board of Health

To the Honorable City Council:

The local Board of Health hands you herewith its annual report for the year 1910. Measures intended to safeguard the city's health have been of first importance. At the very outset notices, and orders when necessary, were issued to the owners of buildings coming within the meaning of the "fire escape" regulations of the State Board of Health. About a dozen buildings have been properly equipped, there being one or two not yet completed, which means a great saving of life in the event of a serious fire in the down town district.

The work of the year before relative to the elimination of troublesome dry closets was carried on this year until now there are only a very few remaining.

Regular inspections of barns and water supplies used for cows supplying the city with milk have been made and while they are not entirely satisfactory, there has been a decided improvement in farm methods of handling milk. Samples of milk have been taken several times of each of these dairies, the laboratory reports showing the milk to be of good standard in the majority of cases.

The matter of most serious concern to the local Board of Health has been that of cleaning up the water shed. Repeated samples of water taken at various intervals and at different places have shown such unmistakable evidence of pollution with a concurrent typhoid fever out-break, this year as well as last, that this Board cannot express itself too forcibly in the matter of urging upon the citizens the

necessity of securing pure water. The present process of "bleaching" the water should not be considered as a permanent, or altogether safe, method to rely upon. It is a temporary expedient that has given a certain protection, as evidenced by the sudden drop in typhoid fever cases reported in our recent epidemic. For the months of August and September there were 49 and 36 respectively, while for October and November there were 9 and 4 with none for December. The Board feels that in no other way can this sudden drop be explained than that it was the direct result of the action of the "bleaching powder" in purifying, by disinfection, otherwise dangerous water.

That milk might be the cause of the recent typhoid fever epidemics has not been forgotten or neglected. A careful examination has been made by the local Board of every shown suspicious milk supply, as to farm buildings, private water supply, personal hygiene of attendants, or any other suspicious circumstances. Laboratory examinations have been made of suspicious water, milk, and of fecal matter and urines of typhoid suspects, so far as possible.

That milk is the primary cause cannot be considered from the data thus secured. Reports from the laboratory of Hygiene, personal histories, age of persons affected, the large number of adults not milk drinkers, the number of persons affected not in possible contact with suspicious milk, the fact that the epidemic was not continuous throughout the year, with the suspicious milk constantly in circulation, and that the epidemic began abruptly, directly following known pollution of our water supply; these facts cannot justly condemn milk except as it may have been polluted by the careless washing of milk

utensils in a dangerous water. That milk thus affected exaggerated the epidemic is evident.

The inspector for the State Board of Health has made a canvass of practically every case of typhoid in these epidemics unbeknown to the local Board and the opinion of the State Board of Health is primarily based upon his findings, not that of the local Board.

During the year the new Isolation hospital has been completed, thus affording the city a desirable place for the care of the dangerous infectious diseases that for one reason or another are not otherwise properly cared for.

Milk licenses have been issued to 26 applicants for the distribution of milk under the rules and regulations of the State Board of Health.

The scope of the investigative work of the Board as carried on for the past year is only partially represented by the accompanying tabulation. Inspections or investigations:

Dairy farms.....	50
Water shed.....	12
Quarantines (violation).....	31
School houses.....	10
Defective plumbing.....	8
Defective sewers.....	4
Ice supplies.....	3
Pure foods.....	10
Buildings, fire escapes.....	12
Nuisances, Rubbish, dead animals, etc.....	28
Cause sudden deaths.....	4
Livery stable, manure piles.....	5
Dry closets.....	13

The Board has endeavored to be educational in its work along sanitary lines. Motion pictures have

been secured upon several instructive health subjects, such as the Fly picture, Filaria, Sleeping sickness; "The man who learned," clean versus dirty dairying, and others indirectly bearing upon health work. The management of the picture houses have at all times been only too willing to secure any film suggested.

There were 249 burials as follows: Evergreen Cemetery 97; Evergreen vault 10; St. Joseph's Cemetery 12; St. Joseph's vault 4; Calvary Cemetery 79. There were 50 bodies, from Rutland, buried

within the State, and 4 buried elsewhere. There were 7 bodies brought to Rutland for burial.

The city's vital statistics are necessarily unsatisfactory on account of the typhoid epidemic, we should feel grateful, however, that there were so few fatalities out of so many cases, a remarkable low mortality for this disease.

Yours respectfully,

CLARENCE F. BALL,
Secretary of Local Board of Health.

Report of the City Physician

To the Honorable City Council:

I respectfully submit the following report as City Physician:

There was about the same amount of sickness as in 1909, but more contagious diseases were encountered than during that year. Four deaths occurred, one at the city farm, one at the hospital, and two among the poor not cared for at the farm; causes, heart and lung troubles, etc.

I found less destitution among those I visited than during either of the previous three years I have held the office of City Physician.

The Rutland Missionary Society has provided a trained nurse to attend upon such sick persons as are unable to hire a nurse—an act that is highly commendable and that will be much appreciated by all concerned.

The Rutland Hospital was of great service to the poor, especially during the epidemic of typhoid fever.

I wish to call attention to the necessity of providing the necessary utensils for a physician's use at the city farm, and to suggest that a separate room be devoted to his use. It is very difficult to treat some cases as things exist there at present.

ANNUAL REPORT

All with whom I have come in contact in performing my duties as City Physician have given me prompt and cheerful assistance, and I take this opportunity to extend to them my thanks.

Respectfully,

M. J. MANGAN,
City Physician.

Report of the Inspector of Buildings

To the Honorable City Council:

I have the honor of submitting the following report for the period beginning Jan. 1, 1910, to Jan. 1, 1911:

Blocks built.....	2
Houses built.....	25
Additions built.....	22
Garages.....	5
Piazzas.....	21
Buildings moved.....	6
Poultry houses.....	15
Barns	7
Sheds.....	13
Store houses.....	3
Boiler shop.....	1
Buildings torn down.....	2
Safty deposit vault.....	1

Respectfully submitted,

M. W. DUNN,
Inspector of Buildings.

Report of the City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the city scale during the year 1910:

Paid the City Treasurer for 1,933 weights	\$193 30
Weigher's fees.....	96 65
Net.....	<u>\$96 65</u>

Number of loads of coal, etc., weighed for the school buildings, City and Memorial halls, free of charge, 292, making the whole number of weights, 2,225.

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Librarian's Report of the Rutland Free Library

To the Honorable City Council:

The twenty-fifth annual report is herewith respectfully submitted:

Number of volumes in the Library February 1, 1910.....	17,298
Increase by purchase.....	470
Increase by gift.....	70
Increase by binding periodicals.....	50
Numbers added from renting list.....	124
All other sources.....	25
	<u>739</u>
	<u>18,037</u>

Number of volumes worn out and withdrawn.....	79
	<u>17,958</u>

Number of volumes withdrawn on account of sickness.....	9
	<u>17,949</u>

Number of volumes lost and not replaced.....	3
--	---

Number of volumes in the Library Feb. 1, 1911.....	<u>17,946</u>
--	---------------

Number of volumes lost and replaced.....	5
Number of volumes worn out and replaced.....	68
Number of volumes rebound.....	289
Number of volumes repaired at Library.....	1,070
 Circulation for 1909.....	 66,768
Circulation for 1910.....	63,521
Decrease for 1910 (in fiction).....	3,247
 Number of new cards issued during 1910....	 726
Number of new cards issued during 1909....	556
Number of new cards issued to children during 1910.....	238
Number of new cards issued to children during 1909.....	234
Number of teachers' and subscription cards issued during 1910.....	237
Number of teachers' and subscription cards issued during 1909.....	209
Number of books drawn by teachers during 1910.....	14,553
Number of books drawn by teachers during 1909.....	14,469
Number of books of fiction drawn by children during 1910.....	10,982
Number of books of non-fiction drawn by children during 1910.....	2,991
Number of days the Library has been open	303
Largest daily delivery, Jan. 14, 1911.....	517
Smallest daily delivery, Feb. 17, 1910.....	23
Average daily delivery.....	210
 Amount received from fines, 1910.....	 \$177 72
Amount received from subscriptions, 1910..	10 00
Amount received from Association fees.....	96 00
Amount received from bulletins.....	1 95
Total.....	\$285 67

Number of periodicals subscribed for during 1910.....	68
Number of periodicals received by gift.....	25
	93

CIRCULATION

The circulation as it stands says that 66,768 books and pictures were circulated in 1909 as against 63,521 in 1910. The decrease in circulation comes entirely in the fiction class, while the circulation of non-fiction and pictures show a small increase. The per cent. of fiction circulated was 65 per cent. in 1910 as against 66 in 1909 and 67 in 1908.

ACCESSIONS

From the Book Committee's lists 131 volumes of fiction and 194 volumes of non-fiction have been purchased while for the children's department 70 works of fiction and 73 of non-fiction have been added. We have found it possible owing to the gift of 124 volumes of fiction taken from the Renting list after they had paid for themselves to use a larger proportion of the money for non-fiction and children's books.

BULLETIN

A bulletin containing all the accessions 1361 vols. gifts and books purchased from 1908-1910 was published during the year.

READING ROOM

A rough estimate, beginning in March last year, shows an attendance in the main Reading Room of

1,434 persons. We have now 93 magazines and papers in the Reading Rooms, 25 of which were received as gifts during the year.

Respectfully submitted,

LUCY D. CHENEY,
Librarian.

Treasurer's Report of Rutland Free Library Association

To the Honorable City Council:

Following is the report of Mrs. Eleanor P. W. Brehmer, treasurer of the Rutland Free Library Association:

RECEIPTS	
Balance forward from 1909-1910.....	\$1,383 27
Appropriations	\$1,943 98
Fines, bulletins, etc.....	211 40
Association fees.....	93 15
Special funds.....	138 57
Sundries.....	14 00
	2,401 10
	\$3,784 37

DISBURSEMENTS	
Books.....	\$955 91
Binding	224 67
Salaries.....	1,264 85
Incidentals	238 73
Printing.....	102 65
	2,786 81
Cash on hand.....	\$997 56
	\$3,784 37

We hold as trust the following:

Theo. L. Smith trust fund.....	\$1,000 00
Interest to Jan. 1st.....	89 59

ANNUAL REPORT

Joel B. Harris trust fund.....	652 44
Interest to Jan. 1st.....	57 11
Seaver fund.....	300 00
Interest to Feb. 1st.....	51 66
	<u>\$2,150 80</u>

Respectfully submitted,

ELEANOR P. W. BREHMER,
Treasurer.

I have examined the above accounts and find them correct as stated.

CORNELIA C. PERKINS,
Auditor.

ANNUAL REPORT

OF THE
SCHOOL COMMISSIONERS
AND
SUPERINTENDENT OF SCHOOLS
OF THE
CITY OF RUTLAND

FOR THE
YEAR ENDING DECEMBER 31

1910

School Calendar

1910-11

(38 WEEKS)

FALL TERM

Fall Term begins Monday, September 12, 1910, and ends Friday, December, 16, 1910—14 weeks. Vacation, 17 days.

WINTER TERM

Winter Term begins Tuesday, January 3, 1911, and ends Friday, March 24, 1911—12 weeks. Vacation, 9 days.

SPRING TERM

Spring Term begins Monday, April 3, 1911, and ends Friday, June 23, 1911—12 weeks.

SCHOOL SESSIONS

For the grades 9 to 12 o'clock a. m. and 1:30 to 3:30 o'clock p. m.

For High school 8:45 to 12 o'clock a. m. and 1:30 to 3:00 o'clock p. m.

Holidays: Thanksgiving Day, January 2, February 22, May 30.

No school signal, six blasts on the fire whistle (—————) given at 8 or 11:30, closes kindergarten and first four grades for the half day following.

The same signal repeated—no session in any school for the half day following.

Regular meetings of the Board of Education, first Monday evening of each month at 7:30 o'clock. Superintendent's Office, High School building.

Office hours of Superintendent of Schools, 8:30 a. m. to 10 a. m. on school days. Office, High School building.

Report of the President OF THE Board of School Commissioners

To the Citizens of the City of Rutland:

We respectfully submit for your consideration the customary annual report of the schools of this city. The supervision and management of your schools are to a large extent under the immediate charge and direction of the Superintendent of Schools who has made a somewhat detailed account of the work during the past year, and to his report we ask your careful attention.

The financial statement for the year ending Dec. 31, 1910, made by the Finance Committee of the School Board, is attached to this report.

You will note that the gross receipts for the support of the public schools in this city during the past year have been \$52,239.33. Of this amount \$43,742.11 was realized from city taxes, \$6,070.38 from the state, and the remainder, \$2,426.84 from tuitions and other sources. The total expenditures were \$52,068.29. Of this amount \$41,209.18 was paid for salaries, \$5,270.25 for text books and supplies, \$1,229.09 for repairs, \$2,360.79 for fuel, and \$1,998.88 for sundries. The unexpended balance to the credit of the School Board December 31, 1910, was \$171.04.

Some three years ago the city issued bonds to the amount of \$70,000 for the erection of the Dana School Building and the enlargement of the High

School plant. At that time it was thought that the proceeds of this bond issue would fully cover the cost of these improvements, but on account of the extent of the undertakings and the increased cost of labor and material it was necessary in order to complete and equip these buildings to supplement the amount received from the bond issue by nearly \$10,000, and this amount was taken from the general school funds. This drain upon the current income for the support of schools necessitated in conducting the schools the utmost economy, and in some cases retrenchments. Two kindergarten schools have been closed effecting an annual saving of \$1,200; the membership of all the schools has been kept nearly at its maximum, to prevent opening new schools, notwithstanding the school population in this city has constantly increased; the scope of work in new departments was not enlarged; and extensive repairs were postponed. By adopting this policy the regular work in the various schools was not seriously affected and this extraordinary expenditure was met. With larger school receipts for 1911, resulting from the increase in the city's valuation and from greater contributions from the state, it now seems possible to open up one or more new schools in September and to extend the work in new departments; but to carry out these plans it will be necessary to provide additional accommodations, either at the Pine or Church street buildings, or at both, where the congestion in school enrollment is greatest, and to fit up a work shop for Manual Training.

SALARIES OF TEACHERS

The present schedule of salaries for the grade teachers with slight exceptions, was adopted more

than a dozen years ago. The changed conditions of to-day, especially in the cost of living, would seem to demand at the earliest possible moment a revision of that schedule consistent with the resources of the schools.

CONDITIONS OF SCHOOL PROPERTY

The general condition of the school property in this city is highly satisfactory. Necessary repairs have been promptly made and so far as the Board has been able, the health and comfort of the pupils have been carefully considered and guarded.

The water situation in this city during the past term has been such that, by the advice of the city Health Officer, the city water was not allowed for drinking purposes in the various school buildings. This has led to great inconvenience on the part of pupils as well as tending to corrupt correct habits of sanitation; and it is therefore earnestly hoped that this defect may be speedily remedied by the city.

CONDITIONS OF THE SCHOOLS

We are pleased to report that the progress in the schools in this city during the past year, while not as great in all respects as might be desired, is reassuring and reasonably satisfactory. The regularity of attendance on the part of pupils is noteworthy; the teaching force is efficient and progressive; and the support, moral and financial, by the patrons and citizens alike has been most loyal and liberal.

Respectfully submitted,

ARTHUR LYMAN,
President.

January 16, 1911.

FINANCIAL STATEMENT

Total resources for schools, 1910.....	\$52,239 33
Total expenditures for schools, 1910.....	52,068 29
Balance unexpended December 31, 1910.....	171 04
Average cost per pupil based on enrollment.....	23 04
Average cost per pupil based on average membership	26 67
Expense for free text books and supplies.....	5,270 25
Expense per pupil, based on enrollment.....	2 33
Expense per pupil, based on average membership	2 69

The above statistics are based upon the latest returns to the City Clerk and to the State Superintendent of Education; compared with those of former years they show that the enrollment, membership and attendance have each remained nearly stationary during the past two years, notwithstanding

ing the closing of two schools the enrollment in the Kindergarten department has decreased. The regularity of attendance is noteworthy in that it exceeds the general average of the state and compares favorably with that in the best schools in New England. These good results have been secured largely through the efforts of a truant officer who acts likewise with the private schools in this city. His labors have been most efficient and I recommend that the present policy of securing good attendance be continued.

SCHOOL BUILDINGS

No city in the state has during the past four years made greater improvements in its school plant and its equipment than Rutland, and this has exerted no small influence in bringing the schools to a high degree of efficiency. The erection of the Dana building rendered the rental of private property less necessary and at the same time materially conserved school resources for other purposes. The addition to the High School building, which has now the largest and finest school Assembly Hall in the state, has made the successful handling of the increased enrollment in that school possible. In the near future the heating and ventilating systems in the main structure of the High School building and in the Madison Street building, and the sanitation in the Pine Street building, should be improved. When these changes are made the school property of this city will be in excellent condition and modern in all particulars.

With the increase of population in this city, the Church Street and Pine Street buildings have become congested. More than eighty pupils during each September in the past three years have been sent from these buildings to other schools in the city. If

two additional rooms could be fitted up in the former, and one in the latter building, which is believed by competent experts feasible, accommodations would be afforded in these buildings for the pupils living in those sections of the city, and the third and fourth grades, which are now combined in each building, could be separated.

WIDER USE OF THE SCHOOL PLANT

Within the last decade public sentiment in regard to the uses of the school plant has radically changed. Instead of such school property being used a scant seven hours daily for 180 days during the year, less than one-half of the usable period, it is becoming more and more the policy to put such property to the greatest possible use for the benefit of the citizens of the city. We can no longer restrict the word education to the few fundamental operations so often characterized as the "three R's." The newer idea does not limit its application to the schooling of children but extends it to the intellectual progress of all who would follow the paths of learning.

The school building is the natural focal point of the community's social life since it centers the universal interest in children, and cuts through social, religious and racial lines. At the same time the school plant already belongs to the people and it is proper to employ it for their social activities.

"Every school house, so far as possible, should become a center of community life."—Superintendent Gordy of Springfield, Mass.

"As President Eliot has pointed out, there can be no waste of money in public school administration comparable to the waste involved in permitting millions of dollars worth of property to remain un-

utilized except during the hours when school is kept."

—Superintendent Maxwell of New York City.

"The National Education Association heartily endorses the use of school buildings and all school equipment for community interests and social betterment."—Declaration of 1909.

With these statements I am in hearty accord and would recommend to your favorable consideration the advisability of conducting during the coming year one or more evening schools and of affording the amplest opportunity to establish social centers in connection with our school plant.

SCHOOL FINANCES

In conducting any system of schools, financial problems must be met. The President of your Board in his report has called attention to certain conditions in the school finances of this city which are well known to each member of your Board, but which are not generally understood by the citizens at large, and concerning which they should be fully informed.

The growth of the school population during the past four years has required the opening of two new grade schools as well as increasing the membership in all the other grade schools nearly to the maximum; five additional teachers have been employed in the High School, and a policy, liberal far beyond the requirements of law, has been pursued in furnishing text books and supplies. The school expenditures from those three sources alone have increased annually in excess of \$5,000. The extensive improvements in school buildings and equipments during this period has required \$10,000 in excess of all city appropriations made for such purposes, thus turning

the apparent surplus of \$5,000⁷ at the beginning of the year 1909 into a deficit of equal amount at the close of that year. In the meantime, by changes in state laws and city conditions, the Grand List of the city decreased and hence the city taxes for school purposes did not increase to meet these larger expenditures. During this period the only increase in the school revenues were from tuitions and from somewhat larger contributions from the state. While this condition of finances has not materially interfered with the regular work of the schools, it has checked all enlargement of work in new departments and has prohibited all new undertakings, and in general has required the strictest economy in conducting the schools. Happily the outlook for the future is more encouraging; the recent increase in the city's valuation will place at the disposal of the School Board sufficient funds to strengthen the work in all departments and at the same time warrant undertaking new lines of work delayed thus far for lack of funds.

TEACHING FORCE

The policy suggested in my report of two years ago relative to filling all future vacancies in the teaching force with trained and experienced teachers, has been with one exception strictly adhered to. Of the sixteen positions to be filled since that date, five were filled by college graduates, six by normal graduates of four year's courses, and four by teachers specially trained.

All these teachers had completed the equivalent of a four years' course in approved High Schools, prior to receiving their professional training.

Twenty-two teachers now hold certificates for life, which shows that the holders have taught in

this state in excess of 500 weeks. The present teaching force consists of the following:

High School teachers.....	14
Grade teachers.....	42
Kindergarten teachers.....	2
Special teachers.....	6
Total.....	64

The teachers prepared for their professional duties as follows:

	1909	1911
College bred.....	7	10
Normal trained.....	6	10
Pupil teachers.....	15	15
Academies and High Schools.....	24	22
Special training.....	10	7
Total.....	62	64

The teaching force as a whole is strong and efficient and compares most favorably with that in other cities in New England of the size of Rutland, and if the present policy of engaging teachers is continued it cannot fail to place our schools on a still higher plane of efficiency.

VACATION SCHOOL

For the past five years a summer school has been in session for four weeks immediately following the spring term for the benefit of all pupils in the intermediate and grammar grades who failed of regular promotion. The work undertaken with these pupils related chiefly to reading, English and arithmetic. Teachers of broad experience were employed at an annual cost to the city of about \$110. The attendance was entirely voluntary yet the yearly enrollment has exceeded 50 pupils and of these about 85

per cent. have yearly been promoted on trial to the next higher grade; and upon investigation it has been found that of such pupils promoted, who continued in school the following year, about 80 per cent. did satisfactory work.

The results thus obtained for the five sessions can be summarized as follows:

Whole number of pupils enrolled.....	237
Number of pupils promoted.....	201
Number of pupils leaving school during the following year.....	20
Number of pupils failing of promotion at the end of the following year.....	42
Number of pupils promoted at the end of the following year.....	139

These results are highly satisfactory and seem to warrant the continuance of this plan for grade pupils, and to justify its extension to the High School.

For the past two years a summer school for teachers has been in session in this city during the last two weeks in July; the attendance of teachers and instructors each year has exceeded one hundred twenty-five. The teachers who have attended these sessions speak in most complimentary terms of the work accomplished and the benefits derived by them. The state has made an annual contribution of \$500 for the support of this school and should the demand warrant doubtless arrangements can be made to continue permanently such a school in this city.

MANUAL ARTS

Rutland was the first town in the state to introduce into its school system systematic instruction in Manual Training and Domestic Science, as well as

the first to employ specially trained teachers to direct that work. For four years excellent work in sloyd by the boys, and plain sewing and mending by the girls, have been done in the grades, and for three years a two years course in Domestic Science has been offered the girls in the two lower classes in the High School; the popularity of this latter course is shown by the fact that nearly every girl in those classes elected this study, and more than 50 girls in the two higher classes have asked that the course be extended through the four years in the High School, but for lack of teaching force this request was not granted.

On account of the large expenditures upon the school buildings during the last three years, no attempt has been made to enlarge the scope of the work in this department and as a result Rutland has not, even in Vermont, maintained her rank and prestige in these studies, while she has fallen far behind the advancement made elsewhere in towns possessing the best schools in this country.

Rutland is distinctively an industrial center and she should not hesitate to offer the youth in this city the best possible advantages in preparing for life's work. The charge is too often madethat the schools are educating away from the work-shop and the farm, rather than toward them. That is not good education that makes the youth look down upon manual labor and fills him with aspirations for a more genteel occupation. The schools should arouse the youth's pride in the industries of our country and should show him the commercial and economic importance of skilled labor; they should give his hands the love for tools by teaching them skill, and finally they should make him a worthy citizen by

imparting the knowledge of his duties and responsibilities to the state.

In the report of the special committee appointed by the American Confederation of Labor in 1908 to investigate the methods and means of industrial education in this country and abroad, and printed in their official organ in 1910, are found these statements. "It is believed that the future welfare of America largely depends on the industrial training of our workers. If the American workman is to maintain the high standard of efficiency, the boys and girls of the country must have an opportunity to acquire educated hands and brains such as may enable them to earn a living in a self-selected vocation and to acquire an intelligent understanding of the duties of good citizenship. No better investment can be made by tax payers than to give every youth an opportunity to secure such an education. Such an opportunity is not now within the reach of the great majority of the children of the wage earners. The present system is inadequate and unsatisfactory.

"Owing to past methods and influences, false views and absurd notions possess the minds of too many of our youths, which cause them to shun work at the trades and seek the office or store as much more genteel and fitting. This notion will be entirely eradicated if industrial training becomes a part of our school system and in consequence of this system of training the youths will advance greatly in general intelligence, as well as in technical skill, and in mental and moral worth, and will be a better citizen and a better man and will be more valuable to society and to the country."

The sentiments expressed in this report are largely in accord with those expressed by every com-

mittee investigating this subject during the past ten years.

The work in Manual Training and Domestic Science in the schools of Rutland, considering the time and money expended, has been successful and profitable; but to secure the greatest returns, better equipment and better accommodations must be provided, a more systematic course must be mapped out, and a more definite and fixed purpose must be adhered to.

To encourage industrial training in the schools, the state now makes an annual contribution of \$250 to towns where it is taught, and a slight addition to this amount by the city would provide necessary equipment to enlarge the work. It is very desirable that a course in wood and metal working be at once offered to the boys in the ninth grade and to a limited number in the two lower classes in the High School, which would require equipping a suitable work shop and, until better accommodations could be provided elsewhere, the basement of the new High School extension could be utilized for this purpose.

HIGH SCHOOL

The enrollment in the High School is now the largest in its history, and the tuition from non-resident pupils exceeds \$2,000 annually. The course of study has been revised, the faculty enlarged and the accommodations and the equipments greatly improved. The school is recognized as a strong fitting school for college, as well as doing excellent work in all its departments and deserves the approval and continued support which it is now receiving.

The growth in numbers has been such that the building is now taxed nearly to its capacity, and for

this reason it becomes more and more necessary to maintain the high standard for admission, not only for graduates of our grammar grades, but also for tuition pupils. The Principal's office and the Commissioners' room have each been given up for recitation purposes, necessitating all these officials to share with the Superintendent his office. It would therefore seem advisable in the near future to give up to the needs of the school the present office of the Superintendent and to seek quarters elsewhere for him and for the School Commissioners.

TRAINING COURSE FOR TEACHERS

The General Assembly at its last session enacted that the School Board of any town maintaining a high school of the first class and employing three or more regular teachers may establish and maintain a teacher training course in connection with such high school under the direction and with the approval of the Superintendent of Education; and the state contributes eight hundred dollars annually for such teacher training course provided the town expends in salary for the principal teacher in that department at least two hundred dollars in addition. The town and state also pay the tuition of non-resident students under the same conditions as now apply to such students attending the High School; and the state grants to graduates from such courses a certificate which shall be a license to teach in the public schools of this state for a period of five years.

By the provisions of this act the state encourages by substantial aid the establishment of training courses for teachers in the strong high schools. In view of the central location of Rutland and the facilities that our High School can offer and the probable large number of students in this city and vicinity

who purpose to enter the teaching profession, I recommend that the School Board establish such a course of training in our High School as will afford the greatest possible advantages to prospective teachers and at the same time reflect the greatest credit upon our school system and the city.

TEACHERS' MEETINGS

Grade meetings and model lessons similar in kind and number to those held in former years have been conducted during the year. Teachers have been granted visiting days in accordance with the regulation of the School Board, and they have entertained in their own schools an unusual large number of teachers from other towns who have found it profitable to visit the schools in this city.

The Rutland Teachers' Association has held during the year nine meetings with the following speakers:

1910

January 24—Henry L. Southwick, President of Emerson School of Oratory, Boston, Mass. Subject: "Shakespearean Recital, 'Richard III.'"

February 18—W. P. Bradley, Prof. of Chemistry, Wesleyan University, Middletown, Conn. Subject: "Life Saving Service of United States."

March 18—Hon. R. F. White, New York City. Subject: "Utah and the Mormons."

April 15—Hon. Henry Houck, Ex-Supt of Education, Harrisburg, Pa. Subject: "Bound to Win."

May 20—E. D. Collins, Prof. of Pedagogy, Middlebury College, Middlebury, Vt. Subject: "Training of Teachers."

September 30—I. C. Smart, D. D., pastor College Street Church, Burlington, Vt. Subject: "The Cook Stove vs. the Circus."

November 4—Rutland Teachers' Association, Rutland, Vt. Subject: "A Dorr Night," in honor of Julia C. R. Dorr, Lit. D.

November 15—E. D. Judkins, D. D., pastor of Methodist Church, Glens Falls, N. Y. Subject: "The Saviour of our Democracy."

1911

January 23—Leland Powers, President of Leland Power's School of Oratory, Boston, Mass. Subject: "David Copperfield."

EYE AND EAR TEST

The following data comprehend the results of the examination of the eyes and ears of the pupils in the public schools of the City of Rutland, made in September in accordance with the state law; these data, which are more favorable than ever before obtained in this city, are published in the belief that they will be of interest and help to parents.

	1909	1910
Number of pupils examined.....	1,600	1,587
Number of pupils found defective	317	295
Percent. of pupils found defective	<u>19.8</u>	<u>18.5</u>

SPECIAL REPORTS

Annexed to this report will be found those of the Principal of the High School, Supervisor of Music, Supervisor of Drawing, Supervisor of Manual Training, Supervisor of Domestic Science, and Truant Officer. We ask your careful attention to these reports which give a general idea of the scope of work done in these various departments..

CONCLUSION

Nothing unusual has occurred during the year to interrupt the work done happily and faithfully by pupils and teachers. It might be difficult to prove that our schools are better or poorer to-day than they were a year ago. The aim, however, has been constant, to adapt the work to the child, that his mind may grow normally, to surround him with influences leading to right moral development, to inspire him with desires for the best and to help him train his powers so that he may render his best and

noblest service in life. In the course of study, emphasis has been placed throughout on the essentials; the commonest studies, reading, spelling, writing, arithmetic, and the correct use of English have been regarded the most important, and these have constantly received the greatest attention.

Along these lines the schools are working and in our opinion are steadily improving, and in closing we desire to commend all who have in any way contributed toward this advancement.

Respectfully submitted,

DAVID B. LOCKE,

Superintendent of Schools.

Rutland, Vt., Feb. 1, 1911.

Report of the Principal of High School

Mr. D. B. Locke, Superintendent of Schools:

Dear Sir:—Inasmuch as my report of last year was not published I am under the necessity of making this, my second report which I have the honor of herewith presenting to you, cover a period of two years, from Feb. 1909 to Feb. 1911.

Growth and change in a school, as in all other things of the spirit, are very slow and go on so silently as to be almost unnoticed, except over time-periods of considerable length. Even then they are sometimes of such a nature that they are felt rather than seen, and felt even only by those most nearly concerned in them, the teachers, the parents, and the pupils. If, therefore no serious attempt is made to set down, to the eye, indications of change and growth in the High school since the last published report it is because I recognize the difficulty, perhaps the futility, of such an attempt. Such things, however, as may be easily noted I proceed to call your attention.

On the whole, the two years have been very pleasant, and there has been a steady growth of mutually agreeable and harmonious relations between the school on the one hand, and the community, the school authorities, and the homes of the pupils on the other. Within the school there have been harmony, oneness of purpose, and mutual helpfulness in the body of teachers, a growing spirit of friendliness and sympathy between pupil and teacher,

and a fine and healthy responsiveness among the pupils to what is good, both in study and conduct.

The present Course of Study, carefully re-written and re-arranged by the teachers and approved by the Superintendent, went into effect in September, 1909, and, with a few changes made in the Commercial Course in June, 1910, has, by its greater variety without any total increase of hours, added much to the interest of the work. At the same time a system of free hours or "omits," made possible by the new "Course" and necessary by the special studies and laboratory work, was instituted and, by giving short breathing spaces for teacher and pupil, has proved to be good for both. Some changes in text books, made at the same time, have worked well and have given the satisfaction to the teachers they were expected to give. In this connection it is fitting to mention the generous provision made by the Board this year, for books of reference. It has been timely and helpful in every way and the books have already been a satisfaction and a pleasure to both teacher and pupil. The chief aim, of course, in all such changes and additions is the betterment of the real work of the school, that for which it is mainly instituted and without which it cannot be permanently satisfactory to the community it serves. I am specially glad to be able to report to you, at this time, that the work of the school is good, and steadily growing better, both in quality and spirit, and the same can be said of the order. As a proof of the good work of the school let me cite the following:

"In 1910 students entered the following colleges and other institutions direct from Rutland High school: Middlebury, U. V. M., Norwich University, Yale, Harvard Dental, Dartmouth, Amherst, Rensse-

laer, Syracuse, Smith, Mt. Holyoke, Simmons, Pratt Institute, Miss Wheelock's School, Bryant and Stratton, and LaSelle Seminary—twenty-five candidates in all."

In evidence of the improvement of the order of the school, both in quality and spirit, it may be said: From Feb. 1, 1909, to Feb. 1, 1910, only six suspensions, and none of these second or indefinite suspensions, were necessary; but from Feb. 1, 1910, to Feb. 1, 1911, only one has had to be made and that one not within the present school year.

The increase in the registration of the school in the three years since 1908 has been very rapid, the enrollment reaching, this year, 377, exclusive of post graduates and specials, or 383 in all, so that, when in my first report I said there was no good reason why the Rutland High school should not be the largest in Vermont, I did not suppose this result would be reached so soon. During the same period the increase in the tuition list has been upwards of 25—representing an increase of \$900 in tuition—leaving an increase of about 75 in the natural local growth of the school. This has been due chiefly to the better holding together of the lower classes in the school each year, i. e. a slighter falling out, always a sign of a healthy condition as it means greater personal interest in the pupils on the part of the teachers, and more careful attention to the teaching. While the rate of increase for the past three years is not to be expected indefinitely yet next year it is likely to hold, for after the graduation of the class of 1911, 69 in number, there will remain in the three lower classes upwards of 280 so that with an entering class as large as in September last, 124 in number, the total enrollment at the beginning of the next

school year will be easily over 400. In the High school building there are, at present, 390 seats and it would be extremely difficult to find place for 25 more without serious overcrowding in mere seating. But it must not be supposed for a moment, that as many pupils as can be seated can also be provided for in recitations. We are, even this year, using the Assembly Hall once a week for recitation purposes so that with a normal increase next year an additional recitation room will be needed. As to the additional teacher that will be necessary I renew my recommendation and request of two years ago that a man be appointed, part of whose work shall be as coach of the foot-ball and baseball teams. The expense of a coach would thus be borne by the School Department, the coach, being a member of the Faculty, could be held to strict account by the school authorities and, best of all, the parents could feel that their boys were in safe and responsible hands on the athletic field and on their trips.

It gives me pleasure to report that all the enterprises and functions of the school are in a wholesome condition. The athletics are supporting themselves, are well organized and, being under the joint control of the Faculty and the students, are well and harmoniously conducted. The "High School Notes" has become a school paper under the name of "The Oread" and is holding its own among the best High school papers of the country. The Girls' Glee Club maintains its good record and will give, in due time, its annual concert, always a pleasing entertainment to the people of Rutland. The High school "Fair" seems to be well established, both as a means for raising money for athletics and as a time of reunion for all High school interests, graduate and other.

The matter of school dancing, which promised to be particularly difficult on account of the attitude of the community toward dancing in general, has yielded to wise and patient treatment and seems now to be satisfactory to all concerned. The number of dances, wholly under the control of the school, is five each year: One to the in-coming class in the fall, one by the Junior class in the winter term, and two by the Senior class, and one to the graduating class sometime in the summer term. These dances are open only to members of the school.

As I have studied more and more carefully the work of the school and have become better acquainted with it personally, I have come slowly to two or three conclusions which I wish to state here. (1) I begin seriously to doubt the value to the High school of algebra in the ninth grade and to believe that the time spent upon it there would be more profitably spent on a careful, rapid review on the processes of arithmetic, especially those that are fundamental to the algebra, so as to refresh the memory of them just before the pupils enter the High school. (2) I doubt the value of the cooking in the High school that does not form an integral part of some well-thought-out course in domestic science, I mean mere cooking. But a course in domestic science, extending over four years, one hour a week at least and employing the entire time of one teacher and using all the laboratories of the High school, in which cooking took its proper place and of which it formed an integral part might be made, it seems to me, of real value. (3) I believe the indiscriminate and unregulated furnishing of supplies that perish in the first using is not only a matter of considerable useless expense, but tends both to wastefulness and

to habits of wastefulness in the pupils of the High school. I could wish, therefore, that all supplies of practice paper, particularly the yellow abomination we have to use, and of pencils, except those for the drawing classes, might be cut off, and only paper for examinations and tests be supplied. The matter seems to me worth careful consideration.

In conclusion I wish to say that as I have observed the fine school spirit growing up steadily in the High school and have noted the excellent work done there day by day and term by term, it has seemed to me and my teachers a not unworthy ambition to make of Rutland High school the best, as it is already the largest, in the state. If, therefore, we have seemed at times to ask for large things it has been in the hope that the community, too, might be proud of the school. That we continue to ask is no evidence that we do not appreciate the Board's generous giving in the past. We are grateful for it and more grateful, still, for the confidence in the management of the school of which their giving is an evidence. It will be ours to show that their approval and confidence have not been misplaced.

Respectfully submitted,

ISAAC THOMAS,
Principal.

Rutland, Vt., Feb. 1, 1911.

Report of the Supervisor of Music

To David B. Locke, Superintendent of Schools:

I hereby make my report as Supervisor of Music for the year 1910-1911.

In making this report so soon after assuming the duties of Supervisor, I realize that its content will be somewhat meager. I am unable to make any comparisons with the work of previous years or to avail myself of what would doubtless be valuable deductions therefrom. It has been my aim to build on the good foundation which has been laid by my predecessors in office, following very largely the outline of work with which the teachers are already familiar, occasionally adding some feature tending either to give greater scope and usefulness to the study material, or to develop a perception of musical construction which ultimates in an artistic and satisfactory rendition of *all* the music, giving even to the more mechanical studies an element of pleasure as well as of profit.

A progressive and logical method of instruction has been in operation for some time past, resulting in some refreshingly proficient classes even in the lower and middle grades. By the time the ninth grade is reached a high degree of excellancy is attained, these pupils singing difficult music in three parts entirely unaccompanied.

The Freshman class in the High School works under the handicap of many changing voices among the boys, and their small experience in using the bass clef, but as they have the help of piano accompani-

ment and the inspiration of numbers; the class will doubtless gain much in ability during the remaining terms and present many valuable members to the Senior chorus next year.

This chorus is composed of pupils of the three upper classes, and as the membership is voluntary, we have a body of interested and proficient singers numbering about one hundred and twenty-five which is in every way a credit to the graded schools where their technical knowledge was acquired, to the High School of which they are members, and to the city to whose musical life they will make large contributions.

One feature of the work which from year to year probably varies more than any other is the High School Orchestra, depending, as it must, upon the number and ability of players who may happen to be enrolled as pupils in any given year. Rehearsals of the orchestra are being held weekly, recruits are still being added, and it is hoped that good results will be rapidly forthcoming.

It is encouraging to note that some of the schools which for various reasons were somewhat backward during the first term, have since been progressing rapidly and give good evidence of ability.

In all the phases of the work the cordial and painstaking co-operation of the teachers has been a most pleasant and helpful feature, and I desire hereby to express my thanks to the Superintendent, to the Principal of the High School, and to all the grade teachers for their manifest interest.

Respectfully submitted,

CHAS. V. H. COAN,
Supervisor of Music.

Rutland, Vt., Jan. 27, 1911.

Report of the Supervisor of Drawing

To David B. Locke, Superintendent of Schools:

I hereby present to you the report of the work done in drawing in the public schools of this city.

The results of the work in drawing show that decided progress has been made in this study during the past year. This is due, I think, to the fact that a more perfect understanding now exists between pupils, teachers, and supervisors. The pupils understand that to do successfully the work required of them, they must exert all their energies; the teachers understand that while the preparation of much material is required for the drawing lesson the results of the lesson depend directly upon the amount of preparation which has been made; and the supervisor better understands existing conditions.

Even better results could be obtained were more time devoted to this study. Unfortunately the feeling exists in some communities that drawing is not one of the fundamentals and therefore should be relegated to an inferior position in the school curriculum. The fact is that disciplinary drawing is of the greatest educative value. Aside from its aesthetic value drawing in the public schools serves a great purpose for it develops first, the power of expression. Every means of self-expression by which the mind can be unfolded should be developed to the utmost. The man who has a knowledge of the principles of rep-

resentation and can express his ideas graphically by means of pictures or sketches is just so much further advanced than his neighbor whose means of self-expression are limited to the oral or written word. Since the beginning, drawing has been the universal language. Secondly, drawing develops the power of observation. A person trained by a course in drawing to observe closely has clearer images than the person who is not so trained. Indefiniteness of vision leads to indefiniteness of thought. People of trained vision who see not only the salient but the minute features of their surroundings and are trained to think in three dimensions possess a great advantage over those who cannot visualize so clearly, for the best positions in life go to those who can most readily see through its problems. In New York and Boston three, and in some grades, four thirty minute periods a week are devoted to drawing, and in the high schools four thirty minute periods are given each week to this study. Among the regular courses of study offered in the Newton, Mass., High School is a course in Fine Arts. This departure may be regarded as a sign of the times.

The work here is being carried on according to the following plan: Two thirty minute periods a week are allowed for drawing in the grades and in the high schools one forty minute period is given each week to this study. Every month each teacher receives a program which outlines the work for her grade for the coming month. The supervisor arranges two teachers' meetings each month, one for teachers of the first and second, the other for teachers of the third and fourth grades. In all grades below the fifth one lesson is given every two weeks by the supervisor. In all grades above the fourth, of the

two weekly lessons, one is given by the teacher of the grade, the other by the supervisor.

Drawing in the high school is an elective, and this year has been chosen by eighty students. I think it should be an elective except in the case of students who intend to become teachers; these should be required to take this subject. In the high school there are classes for both mechanical and freehand drawing. Work in the freehand divisions is carried on under three heads: Object drawing in outline and in *light and shade, nature drawing in outline and in color, and decorative design. In the mechanical divisions problems in descriptive geometry, orthographic projections and surface developments are worked out and freehand and instrumental working drawings of various models are made.

At this time I would like to thank the Superintendent for the assistance he has always given me, the Principal of the High School for his helpfulness, and the teachers who have all ever been so willing to do their best to carry on the good work.

Respectfully submitted,

ISABELLE MACKENZIE,
Supervisor of Drawing.

Rutland, Vt., Feb. 17, 1911.

Report of the Supervisor of Manual Training

To David B. Locke, Superintendent of Schools:

Dear Sir:—I herewith submit the report of Manual Training for the year 1910-1911.

Manual Training is hand work so arranged and employed as to stimulate and promote intelligent self-activity for a purpose which the worker recognizes as good. The tools employed are instruments by which the hands give expression to the idea.

In every grade in both primary and grammar schools some approved form of manual training should be taught; for manual training develops a constructive mind and every effort to aid such a development is a movement for better citizens. Naturally the school which is exclusively academic lays most exclusive stress on the inleading currents to the neglect of the outgoing currents; it lays more stress on the acquisition of knowledge than on the use of it. Head education alone is conceded to be one-sided and incomplete. One of our leading educators voices the conviction of many when he says:—"I consider it a very poor system of public school education that does not give due consideration to the training of the hand." Manual training gives the student a practical demonstration of what education can accomplish by allowing personal expression in a completed article, generally useful in its nature.

In the third and fourth grades raffia work is taking a step forward. It is surprising to see what

the small hands can accomplish and with what interest and thought the little people work. We begin with the simple winding over cardboard, continue with braiding, sewing, and cordmaking and finally work to weaving and basketry in the fifth grade. The many models worked out are both useful and artistic. This branch of hand-work promotes observation, accuracy and neatness.

From the sixth to the ninth grades inclusive woodworking is taken up by the boys with even greater interest and enthusiasm. We are fortunate this year in having a much better equipped kit of tools; this and the heavier stock of wood used afford a nearer approach to the larger and broader work at which we are aiming.

There is a close correlation between manual training and art work—mechanical drawing and designing. Each boy starts his work by taking notes and making a sketch of the model which he is about to construct, which generally includes a design. This bringing together of the drawing and woodworking is a benefit in several ways; it makes the former more practical, the latter more artistic. Problems in arithmetic, measuring and other subjects enter into the work and have a new and greater meaning to the boy because of their direct application.

I am sure we are all looking forward to the time (which we hope is not far off) when benches and tools will be installed thus allowing a larger scope for the work, which is impossible without proper equipment. The High School that aims directly at life and the welfare of its pupils will give large opportunities for study and work in applied arts. The student under such a favored condition develops initiative and self confidence and acquires a breadth of

view that gives life a fuller meaning, all of which tend towards the acquirement of that proper balance which is the real ideal of culture.

I wish to thank the Superintendent and the teachers for the interest they have extended to me and to my work.

Respectfully submitted,

MARGARET J. CARNEY,
Supervisor of Manual Training.

Rutland, Vt., Feb. 14, 1911.

Report of the Supervisor of Domestic Science

To Mr. David B. Locke, Superintendent of Schools:

Dear Sir:—A report of the work in Domestic Science is herewith presented.

At the opening of the spring term of last year the classes in cooking began their lessons in a room at the High School which through the generosity of the School Board and the Rutland Woman's Club, had been splendidly fitted up for their work. From time to time new articles have been added as they were needed, most important among these being a china closet, a dining table, chairs, table linen and silver-ware.

The first year course in cookery includes a study of the five food classes, water, mineral matter, proteid, carbohydrate and fat, as grouped by dietians, and the use of each in human nutrition. Especial emphasis is laid on the principles of cookery of starchy and proteid foods and fats, also on the preparation and baking of batter and dough mixtures. Special lessons are given including the following subjects: beverages, soups, salads, invalid cookery, basket lunches, table setting and serving and the cleaning of cooking and kitchen utensils.

The second year course includes the preservation of fruit, preparation of menus, cooking and serving of simple meals, with estimates of their costs, and the preparation of more difficult dishes classed under the same subjects studied in the first year.

In all the work the aim has been to show plainly that imperfectly cooked food is a menace to good

health, that simple food is always best, and that careful thought and intelligent planning are as necessary in the kitchen as in any other line of work. I think it may be truthfully said that in no other work do the pupils see more plainly the folly of not carefully following directions.

It is to be regretted that time enough cannot be devoted to teaching this subject in the High School so that all the girls who wish might have cooking lessons.

In arranging a course in sewing, it has been a little difficult to adapt the work to the classes as they are graded for general school work. In the sixth and seventh grades we find many pupils who do as creditable work as do some pupils of the ninth grades. But the child whose ability is least in this work must be considered as much, if not more, than those who excel in the art.

The outline of the course which begins with the sixth grade is as follows: All the stitches used in plain hand sewing are taught. The pupils write from dictation the use of each stitch. As they are learned they are applied to such small articles as dolls' aprons, sewing bags and holders. In addition to these stitches, the pupils are taught to make button-holes, to sew on buttons, hooks and eyes, and they learn one or two simple embroidery stitches. Much stress is laid on the correct position of the needle and the right use of the thimble.

The second year work includes the making of small sheets, pillow-cases and napkins, cloth and stockinet darning, patching, bias piecing, facing, piping, plackets, mitered corners, hemstitching, and embroidery stitches. A book containing samples of

these is kept, as in the previous year. As many small articles as time allows are made.

The pupils of the eighth grade apply the knowledge gained during the first two years to the making of a set of large doll clothes; the new work including the cutting of the garments from a pattern, and the method of putting them together.

This lays the foundation for the ninth grade work when the pupils cut and make simple adult garments such as skirts, shirt-waists, aprons, kimonos and underwear. Machine stitching is taught in this grade and a number of useful fancy articles are made which may serve as Christmas gifts.

The sound educational principle of accepting only the child's best effort has been obeyed and while this may not be pleasant at first, the pupil in most cases, is not long to see that it is for her best good.

Should we ever be tempted to count Domestic Science an "extra" and an intrusion on the time needed for other school work, may we not remember that it is no more reasonable to expect this will be taught at home where the child does not have the stimulus of class work than that home instruction should be given in the three R's. Again shall we reasonably expect the instruction in this work as it is given all over the land in the elementary public schools, will turn out pupils, as do the trade schools and apprentice shops, capable of earning a living by these handicrafts, any more than pupils graduated from high school are capable of entering a literary career or profession without further study? The business of the elementary public school is first and foremost to lay the foundation and lay it well for whatever trade or profession may be followed later in life, and in doing this can we afford to neglect so important a

ANNUAL REPORT

part of the curriculum as the training of the hand?

I wish to express my sincere appreciation of the kindly interest and hearty co-operation which the teachers have shown in this work and of the willing response given by the pupils.

Respectfully submitted,

CORA F. WARREN,
Supervisor of Domestic Science.

Rutland, Vt., Jan. 5, 1911.

Report of Truant Officer

*To the Honorable Board of School Commissioners
and City Council, Rutland, Vt.:*

Gentlemen:—I herewith submit my report as Truant Officer for the year ending December 31, 1910.

Number absences reported.....	641
Number absences investigated.....	641
Number of truants.....	37
Number reasonable and legal excuses.....	604
Number sent to Industrial School.....	1

I find that the number of excuses reported above, as reasonable and legal, are largely due to illness, the mumps being directly and indirectly a largely contributing cause to these absences.

The demand for clothing has been in excess of that of previous years. Some fifty children have been clothed by charitably inclined people, thereby saving the city hundreds of dollars.

The Ward Six Sewing Circle is a step in the right direction, which I trust will be encouraged by the people of this city, by sending to the Pine Street school building cast off clothing, shoes, etc.

I wish to thank the teachers, Superintendent, and others for their kind assistance during the year.

Respectfully submitted,

J. J. HICKEY,
Truant Officer

Rutland, Vt., Feb. 10, 1911.

TABLE OF CONTENTS

Report of the City Auditors

To the Honorable City Council:

In compliance with the city ordinances the undersigned, Auditors of the City of Rutland, here-with submit their report for the year ending December 31, 1910.

We have carefully examined the books and vouchers of the several officers of the city who have in charge the receiving and disbursing of city funds. We find them to have been correctly kept, and have so certified. We have checked up the receipts and disbursements of the City Treasurer and compared the same with his annual report and have found the statements therein made to be in accordance with the records of his office.

Respectfully submitted,

C. TURNER,
THEO. O. DAVIS,
JAKE HEYMAN,

Auditors, City of Rutland, Vt.

January 31, 1911.
